

2020: Volume 66, Issue 3

Dear Reader

*GeoScience Engineering* is an open access, peer-reviewed periodical journal aimed at publishing research results in Earth Sciences, Mining and Geological Engineering. The journal is published by the Faculty of Mining and Geology, VSB-Technical University of Ostrava, Czech Republic, and has been listed among peer-reviewed periodicals published in the Czech Republic since 2010.

We aspire to publish high-quality professional articles from all over the world, both from well-established authors and younger researchers. To stimulate the international exchange of knowledge and research findings, we provide scholars and practitioners with space to publish their original professional articles, reviews, and technical briefs, thus contributing to the interconnections of the academic and industrial sectors.

To communicate with international audiences, we publish in English. All articles are subject to a blind review process. All submissions are judged as for their relevance from the professional perspective, methodology, novelty of research findings, practical implications, and quality of presentation.

The current issue consists of 4 articles on different aspects of Earth Sciences, Mining and Geological Engineering (Geophysical Investigation of the Impact of Solid Waste Dump on Subsurface Soil and Groundwater in Eneka, Rivers State Nigeria by C. Nwankwo and M. Ogoro; Safety of UGS Operation in terms of the Importance of Primary Factors of Tightness of Structures by M. Horáková et al.; An Investigation of Soil Void Effect on Liquid Limit Values Determined by Different Test Methods by E. Komurlu; Verification of Biodegradation Efficiency of Textile Wastewater Using Ecotoxicity Test on *Sinapis Alba* by M. Pavlíková).

Sincerely

*Alena Kašpárková*

Editor-in-Chief
